Resistance Welder Training and Testing

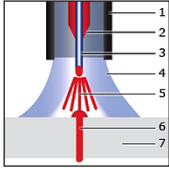

WELD TRAINING

BS Standard/PAS125 Compliant Welder Training.

MIG / MAG Welder Training and Testing

We provide an onsite welding inspection and training service to the automotive industry.

Our welding inspectors are CSWIP 3-1 Qualified , UKAS and IMI verified.

We are pleased to have tested and trained over 200 PAS125 body-shops for successful PAS125 application.

We dont just test , we teach and test!

We teach the operator how to observe welds and correct welding faults especially when spot welding.

We teach them to set up there machines correctly and how to look at there welds correctly and rectify.

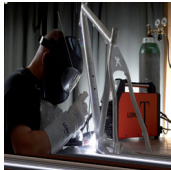

We teach them to MIG braze correctly.

All using your existing welding equipment.

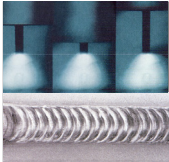

Your new inverter spot welder blowing holes etc? We can teach them how to correct this fault and much more!

We are always here if you have problems , just pick up the phone.

PAS125 , BS1140 (spot) BS4872 MAG (steel) CuSi (braze)

REPAIRS+SERVICE

ALL MACHINE REPAIRS AND SERVICE

OUR engineers are Fully Qualified Welding Technicians. Able to repair and service ALL types of welding equipment onsite.

Full PAS125 servicing of all welding equipment on site.

18 Years machine repair experience

Our ability to component repair and source our spares from the spares manufacturers. Saving you money.

We can repair ALL your welding plant on-site. Saving you money.

We repair to pcb component level . Saving you money.

We are spot welding specialists and repair all makes of inverter spot welding equipment.

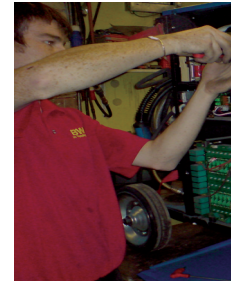

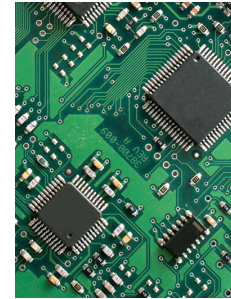

We provide loan sets (when available) if yours has to be removed for repair FOC.

Full site service discounts available . Saving you money .

PROFESSIONAL WELDING ENGINEERS

FOR MACHINE SERVICE / REPAIR

Contact Sales@basicwelding.co.uk or CALL 0161 273 8150

EXAMPLE : Invertaspot GT front LCD screen smashed, machine supplier quoted £1400 our price £300.

Mi100 inverter blown up , machine supplier quote £3000 our quote £1200

Mi100 water pump 50% cheaper than machine supplier.

Welding electrodes 40 to 50% cheaper than distributor.

PATENTED

The QB-802 is a Patented material removal air tool . It gives a large area wear off volume compared to other types of tool . Removes ,rust, oxides ,decal stickers and vinyl trim lines etc quickly without damage to the paint surface .

MERCEDES Riveter

The Taurus 4 is the approved rivet tool for Mercedes vehicle repair. This blind rivet air tool has high power and is made by Gesipa air rivet tools. We supply this at discounted prices from Mercedes listed price.

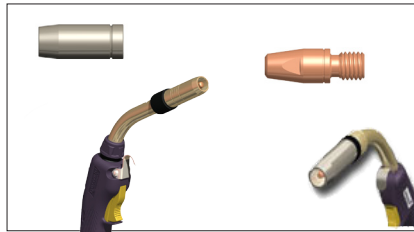

CP7 GAS INSPECTION

Are you health and safety compliant? Our welding engineers are qualified gas safety inspectors and so during an onsite service can inspect and give advice for your Oxygen Acetylene welding plant safety. Competative pricing.

WELDING ELECTRODES

We stock and manufacture welding electrodes for all types and brands of spot welding plant. Our prices wont be beaten simply give us a call with your machine type and model .

TORCHES /CONSUMABLES

We stock all spares for all makes of MIG welding plant . We stock Parweld welding torches and Tweco American Torches . Top Quality Call for prices .

WELDING HELMETS

WE are the cheapest supplier of welding helmets. Our bulk purchasing enables us to pass on the saving to you. Spares for 3M / PARWELD and many more Call for prices .

MIG BRAZE WIRE

CUSI3 WELDING WIRE

WE are the leading stockist of Mig Braze welding wire for the automotive trade.

*We buy in bulk so guarantee our prices are the best in the market.
Plastic spooled 5kg or 15kg*

MIG Welding Torches

TWECO BODYSHOP TORCHES

TWECO torches are designed especially for the bodyshop welder . They have super flexible hoses and the welding nozzles are made from copper and fully insulated . This means you can weld smoother without the fear of the nozzle shorting. The parts last longer than conventional chrome nozzles .

Dent Pulling Consumables

PULLER CONSUMABLES

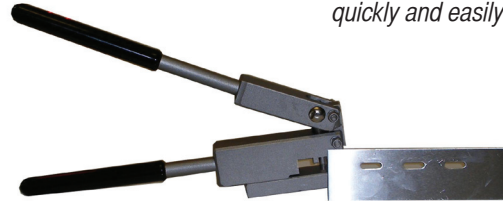

We stock everything for your dent pulling needs and any make and model of manufacturer.

*Aluminium studs for your aludent puller
too pulling washers for your miracle puller .*

All at great prices .

MIG Braze slot tool

Hand Tools

Makes the slots for MIG braze welding quickly and easily.

WELDBAGS

ALL IN ONE SPATTER PROTECTION

*Complete panel protection without stripdown.
Made from 1500 Deg welding spatter protection blanket.
Heavy duty and hard wearing.
The blankets are coated in teflon for a non scratch surface.*

GAS EQUIPMENT

QUALITY GAS SPARES

*Complete Replacement gas consumables in stock. ALL CE approved and at fantastic prices.
We supply with CP7 Certification for your liability insurance criteria.
Call For a Quote.*

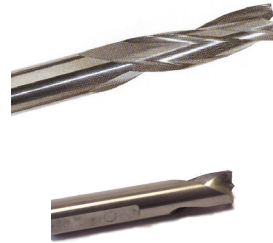

Boron Drill and BALL

BORON /UHSS STEEL

*We Manufacture Boron 3 flute drills and grinding ball points **in house.**
The drills are designed to remove spot welds and the ball grinder laser welds .
Both remove them quickly and easily on these hardened steels .
Drills require low speed air drill and ball grinder fits into normal high speed grinder,
We supply both tools if required.*

HSS Spot weld Removal Drills

SPOT WELD DRILLS

*We Manufacture and resharpen spot weld drills .
Resharpened drills from 99p plus P+P
Our 8% Colbalt drills are great value and available in 8.0mm and 10mm sizes.
CONTACT us about our resharpen service .*

WELDING TECHNOLOGIES

ERGOWELD 13K

MARKET LEADING PRODUCTION WELDER

THE ARO 13000 AMP INVERTASPOT is made by the worlds leading manufacturer of spot welding equipment.

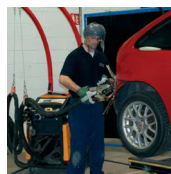

Designed to last , robust and easy to use .

The machine comes with 3 guns , a light C gun for over those back panels and wheel arches and a heavy duty fully water cooled X gun. Easy digital control with programmes for AHSS steels and Boron. As used in the vehicle manufacturers factory production lines. "Weld like the factory" !
